

FAITH IN OUR FUTURE

Diocesan Plan for the Reopening of Schools 2020-2021

EXECUTIVE SUMMARY

This is an Executive Summary of the protocols and procedures, known as the Office of Catholic Schools (OCS) *Diocesan Plan*, for reopening buildings for in-school student attendance at the Catholic Diocese of Peoria elementary and secondary schools. The *OCS Diocesan Plan* includes guidance on health and safety, human resources, finance, and communications.

There are three guiding principles of the *OCS Diocesan Plan* for the reopening of our schools:

1. Our school buildings will provide a safe and faith-filled environment for our students.
2. The course of the pandemic in Illinois remains fluid. As such, this *OCS Diocesan Plan* may be updated on a continual basis as pandemic data and guidelines are regularly reviewed.
3. OCS asks that our school families assist us in serving the common good and work in cooperation with not only their diocesan school but also with the Office of Catholic Schools to the best of their ability.

The *OCS Diocesan Plan* was created from discussions and advisement of the medical community, Illinois Catholic school superintendents, Diocese of Peoria pastors and principals, Catholic Mutual Group, the diocesan Offices of the Bishop, the Chancery, and the Office of Catholic Schools. Guidance documents from the Illinois Department of Public Health, Illinois State Board of Education, Centers for Disease Control and Prevention, and the Governor of Illinois' *Restore Illinois* plan were also studied. For more information, please refer to the *Acknowledgments* and *Resources* sections of this plan.

HEALTH AND SAFETY REQUIREMENTS

This section provides guidelines related to the safety, health and hygiene of students and include specific ideas for integrating into instruction and the school day.

THE COHORT MODEL

The Catholic Diocese of Peoria's elementary schools are to operate under a "cohort" model when buildings reopen. Under a cohort model, students and staff are grouped by grade level. These groupings are designed to allow the same group of students to stay with the same staff (all day for young children and as much as possible for older children) while minimizing the risk of cross contamination between cohorts. It also allows single classes to be quarantined in the event of infection, rather than closing the entire school building. Grade level teachers are considered part of the same cohort as their students, but other teachers (including specials' teachers) and staff are considered outside the cohort.

Even while utilizing the cohort model, schools should strive to physically separate students in the same cohort as much as possible. Such separation will help mitigate risk. For example, classroom furniture should be arranged to maximize social distancing between students.

Diocesan secondary school administrators whose reopening plans cannot operate under a cohort model should design plans to meet the health and safety requirements of wearing masks, practicing social distancing, and using proper hygiene and safety.

Employees and students shall self-report when experiencing any of the symptoms that are associated with COVID19 during the school day.

MASKS AND PERSONAL PROTECTIVE EQUIPMENT (PPE)

All individuals in school buildings (students, employees) are to wear masks.

Families are asked to supply masks for their child/children. Reusable cloth masks are allowed with the stipulation that they be washed every night in preparation for the next school day if using the same mask.

Disposable masks are preferred in the school setting with the intention of disposing at the end of every school day. Parents should send students with extra PPE in case masks are damaged during the day.

Masks should not contain messages or images that would distract from the educational environment of the school.

Schools will ensure an ongoing supply of PPE (disposable face masks, cleaning supplies) for all employees and will maintain a minimum supply of masks for students in case students forget or break their personal mask.

Masks may be removed in special circumstances, i.e., when eating or drinking or engaged in outside activities or outside instruction. Individuals should wash or sanitize hands before putting their face covering back on.

Schools will maintain a regular supply of gloves for cleaning surfaces and treating students with medical injuries/illnesses.

ARRIVAL PROCEDURES – WELLNESS CHECKS

Students and employees will utilize as many exterior doors as possible and assign classes to enter through only their assigned doorway in order to minimize the risk of cross-contamination between cohorts. Congestion should be avoided when entering or departing the building.

All students and employees shall wear a mask when entering the building at the beginning of the school day.

Employees are responsible for taking their temperature every day. Any faculty or staff member (and in very limited instances, volunteers) with a temperature over 100.4 degrees Fahrenheit will be sent home.

Schools will perform “wellness checks” of all students. Employees shall temperature scan each student upon arrival, and any student with a temperature over 100.4 degrees Fahrenheit will be sent home.

Students shall wash hands or receive hand sanitizer upon entering the school each morning to assist with safety and hygiene.

Parents and guardians should not enter the building to escort students to/from classrooms at arrival and dismissal.

Student bus riders will be socially distanced as much as possible, and students will wear a mask and use hand sanitizer when traveling via bus. Per current guidance, no more than 50 individuals should be on a bus at one time.

DISMISSAL

As with arrival, schools will utilize as many exterior entryways as possible and assign classes to exit through only their assigned doorway upon dismissal. Employees will accompany students as they are dismissed.

Parents will be instructed to remain in vehicles instead of congregating outside school exits. Schools should implement procedures to screen student pickups to ensure ongoing safety.

INTERNAL TRAFFIC FLOW

Traffic flow will be designed with the intent of keeping cohorts physically apart throughout the building. Provide physical guides, such as tape on floors or sidewalks and signs on walls, to ensure that staff and students remain at least three to six feet apart in hallways. Depending upon the layout of the school building, consider assigning classes to use specific routes. Principals will carefully think through how students travel through high-traffic areas of the school building, such as the cafeteria, gym, multipurpose room, bathrooms, etc.

Students shall not share lockers. If a school has extra lockers, student lockers in elementary and secondary schools will be spread out by cohort or grade level. Develop a schedule of locker access to mitigate breaking cohorts (e.g., cohorts/grade levels could access lockers at different times if lockers are located in the same hallway).

In the elementary school, passing periods should be avoided. As indicated below, it is recommended that students remain in their grade level classroom instead of traveling to other departmentalized classes.

GENERAL FACILITY CLEANING, HYGIENE, & SHARED SCHOOL SUPPLIES

Schools will follow the building cleaning and disinfection procedures outlined in the guidance from the Catholic Mutual Group and in the ISBE/ IDPH's *Transition Joint Guidance*.

Sharing of school supplies such as pencils, markers and art supplies will be eliminated. Students shall maintain their school supplies in individually labeled containers, cubbies, desks, classrooms, or book bags. Shared equipment, such as one-to-one devices, will be used by as few children as possible and will be cleaned and disinfected before use by another student.

All rooms will have access to either a sink and soap in the classroom or in a bathroom for frequent hand washing and/or have access to hand sanitizer that contains at least 60 percent alcohol.

Spray bottles of cleaning disinfectant will be readily available in each classroom and shared spaces for use throughout the day. Common surfaces in shared spaces (e.g. office, bathrooms, stair handrails, etc.) will be cleaned multiple times per day.

Installing physical barriers, such as sneeze guards and partitions in shared areas, where it is difficult for individuals to remain at least three to six feet apart (e.g. main office desk), may be considered.

Food and drink will not be shared (including student snacks and lunches). Individually wrapped birthday treats may be shared during lunchtime.

Drinking fountains will *only* be used to fill reusable water bottles. Signs will be placed on water fountains indicating their sole use is for refilling water bottles.

When practical, increase the circulation of outdoor air as much as possible by opening windows and inside doors. Do not open windows and doors if doing so poses a safety or health risk to students (e.g., risk of falling, triggering of asthma symptoms, etc.).

When possible, interior doors will be kept open to eliminate the need to use door handles. Be mindful of fire code and student safety when determining whether to keep internal doors open.

For the 2020-2021 school year, schools shall discontinue the use of perfect attendance awards.

CORE CLASSROOMS – REMAINING WITHIN COHORT OR CLASSROOM SUBJECT

Students and staff will continue the use of masks within cohorts and classrooms.

Declutter classrooms with the intent of maximizing floor space. Consideration should be given to eliminating shared spaces, such as reading nooks or instructional breakout tables, until the pandemic has passed.

Arrange desks in rows facing the same direction and provide as much distance between desks as possible. If tables are used instead of desks, attempt to spread out students at tables. Consider taping off tables to separate student workspace.

Frequently clean and disinfect high-touch surfaces daily, including desks and door handles.

Shared classroom spaces, such as science labs, should be cleaned before and after usage by each cohort or classroom.

Students and employees should use hand sanitizer or wash hands with soap after returning to the classroom from any location.

EARLY EDUCATION CONSIDERATIONS

Follow guidelines that apply to core classrooms (see section above).

Classroom supplies may be shared, given the unique educational practices of early education, but limited to *essential use only* and cleaned frequently.

Snacks: Separate students as much as possible (3-6 feet or more). Students may remove masks while eating. Minimize student movement and prevent food sharing. Clean surfaces immediately after snack time.

Naptime (if applicable): Do not permit sharing of cots or bedding. Spread children out as much as possible, and masks may be removed if children are at least three to six feet apart.

DEPARTMENTALIZED CLASSES AND MIXED INSTRUCTIONAL GROUPS

For departmentalized schedules (e.g. junior high and high school programs), students will try to remain in their classroom for all core subjects.

Students and staff will continue to use masks in the classrooms.

Some elementary schools mix students from various grades/classes when utilizing leveled math classes or Title I reading intervention; however, schools should consider avoiding such mixing when possible and use technology to supplement instruction. At the very least, efforts will be made for students to wear masks and socially distance.

For secondary schools, mixing of students from different grade levels is not uncommon. However, students will wear masks and socially distance.

SPECIALS' CLASSES

Whenever possible, specials classes (i.e., art, music, drama, foreign language, STEM, health, etc.) should be held in each cohort's grade level classroom or in the secondary school assigned classroom. Elementary school specials' teachers should try and go to the students, rather than students to the teacher. Specials' teachers will observe distancing in the cohort and wear a face covering.

If a shared classroom is used for specials' classes, such as a computer lab or library, the area will be thoroughly cleaned before being used by another cohort.

Specials' teachers will minimize shared supplies (e.g. art supplies). In any case, supplies will be cleaned between each use particularly when used by different cohorts or different grade levels as in the high school.

Music classes will try to avoid singing or asking students to play woodwinds, brass instruments, and recorders, in order to minimize risk of cross contamination *unless* social distancing can be maintained (*more information on band below*).

Whenever possible, move classes outside, especially physical education classes.

Please note: offering and scheduling specials' instruction is *at the discretion* of the pastor, chaplain and principal during the pandemic.

BATHROOMS

Try to restrict bathroom use to three students or fewer, if possible. Students will wear masks and try to remain socially distant while in bathrooms.

Schools will post signage on bathrooms indicating that no more than three students (*whenever possible*) may be present at a time.

If a school has multiple bathrooms, classes will be assigned to use specific bathrooms at elementary schools instead of allowing students to choose.

MAIN OFFICE AND STAFF WORKROOM

Consideration should be given to install physical barriers, such as sneeze guards, in the main office counter or desk area in diocesan schools.

Spread out seating in the main office to ensure distancing. Eliminate seating when distancing is not possible.

Use tape on the office floor to direct traffic flow and manage any lines, ensuring proper distancing is followed.

Teachers, administrators and staff shall wear masks and maintain distancing when in the main office or staff workroom.

Clean common surfaces multiple times per day, such as counters, desks, doorknobs, copy machines, etc.

Schedule parent, student and teacher meetings virtually, if possible. If face-to-face meetings are required, meet in large open areas instead of more confined spaces (such as the principal's office). Meeting participants should wear masks and maintain distancing.

LUNCH

Consider eating lunch in classrooms to minimize the risk of cross contamination. Lunches may be delivered to the classrooms to avoid having students pick up lunches in the cafeteria.

If students pick up lunches in the cafeteria, only one cohort or classroom should pick up lunch at a time and social distancing will be maintained.

Students will wash their hands or apply hand sanitizer before and after eating.

Surfaces used for lunch should be disinfected after eating.

If using the cafeteria, the cafeteria will be cleaned and sanitized between uses. No more than 50 students (or following the most current IDPH/ISBE guidance) should utilize the cafeteria at one time. Only cohorts should sit within the same area and maintain social distancing.

Try to use disposable food service items (e.g., utensils, dishes) and non-disposable food service items should be handled with gloves and washed with dish soap and hot water or in a dishwasher per IDPH and ISBE guidance. Hands shall be washed after removing gloves or after directly handling used food service items.

With varying elementary and secondary school sizes, the pastor/chaplain and principal will determine the most efficient way for students to eat lunch with the goal of always trying to minimize risk for hygiene and safety.

RECESS

Recess in elementary schools will be scheduled with cohorts to decrease intermingling with other cohorts in order to minimize cross contamination.

Recess equipment, if not assigned to a specific cohort but used by multiple cohorts, will be cleaned between cohorts' usage. If using playground equipment (e.g., slides, swings, etc.), try to schedule for only a single cohort to use each day; thus, playground equipment will only have to be cleaned once a day versus several times a day.

When recess is outside, masks may be removed and social distancing maintained. As students re-enter the building, masks will be worn and hand sanitizer used.

SCHOOL MEETINGS

In the elementary school, with the exception of the grade level classroom teacher and perhaps an instructional aide assigned to the classroom, all other teachers and staff are considered “outside” a cohort. Administrators, front office staff, specials’ teachers, cafeteria, custodial and maintenance personnel, etc., will continue to practice social distancing and wear masks when around others in the school building.

Faculty meetings, professional development and other teacher/staff activities, parent conferences, etc., should be conducted virtually. If this is not possible, masks and social distancing will be practiced.

MEDICAL CARE FOR STUDENTS

Schools will provide ongoing medical care as described in the school’s handbook policies. This includes the authorization to administer approved medications, prescriptions, and basic first aid (with the exception of nebulizer treatments, which should not be administered at school).

Staff should wear gloves and masks when providing medical care for students.

VISITORS AND VOLUNTEERS

Visitors and volunteers will have extremely limited access to the school building during the pandemic including events such as Grandparents’ Day, etc. Parents will be limited to the main office only.

When volunteers are needed to assist under certain circumstances, the principal shall approve and ensure that health and safety protocols are followed.

The school office will keep accurate records of all visitors and volunteers, including the individual’s reason for the visit, contact information and all locations visited in case contact tracing is needed.

STUDENT TRAVEL

Students will self-quarantine after traveling to another country or to another state that is experiencing COVID-19 outbreaks, as determined by the most current guidance from the Governor of Illinois, IDPH/ISBE, and CDC.

Parents/students should inform schools immediately if they display COVID-19 symptoms during the self-quarantine period. Schools should follow the *Infection Protocol* (outlined below) in such instances.

INTERNATIONAL STUDENTS

International students will remain in their American residence for at least two weeks following travel to and from their country of origin and will be allowed to complete work remotely while at home.

Chaperone families and/or international students will inform schools immediately if anyone in the home displays COVID-19 symptoms during the quarantine period. Schools will follow the *Infection Protocol*, outlined below, in such cases.

SHARING BUILDING SPACE

Parish ministries (such as Religious Education classes) and “external groups” (e.g., Boy Scouts, Girl Scouts, etc.) will be asked to use any vacant or unused instructional space. The pastor/chaplain and principal shall

grant access to these required areas with the stipulation that the areas are thoroughly sanitized and disinfected before and after usage by the external groups.

SCHOOL and OUTSIDE REQUESTS for RETREATS

TEC and Koinonia retreats will not be allowed in school buildings during the pandemic. In regard to school retreats, consideration should be given to scheduling any fall retreat to the spring semester. Regardless, when scheduling retreats, schools will follow the guidelines of social distancing, wearing masks, hand washing, and gathering in groups with the number of people as determined by the most recent CDC, ISBE/IDPH guidance.

SPECIAL EVENTS (HOLY MASSES, ADORATION, ASSEMBLIES, FIELD TRIPS, ETC.)

Large group gatherings of special events (i.e., back-to-school information nights, etc.) should be avoided or conducted virtually pending the number of people who can gather safely in one place, as determined by the most recent CDC, ISBE/IDPH guidance, and the Governor of Illinois.

Field trips are prohibited during the COVID-19 pandemic.

Principals will work with their pastor or chaplain to determine the scheduling of school masses and the other sacraments while observing the most current CDC, IDPH guidance for the number of people who can be in a large gathering at one time. Masks will be worn and social distancing observed.

Adoration of the Blessed Sacrament may be allowed in the school or parish church following the above mentioned guidelines of the CDC, IDPH/ISBE, and Governor of Illinois regarding the number of people who can be in a large gathering at one time. Masks will be worn and social distancing practiced. Visitors will not be allowed in the buildings during school-scheduled times for Adoration in order to minimize the risk of cross contamination. Only school employees and students may be in attendance for Adoration if it is scheduled during the school day and is a part of the school's *Spiritual Development Plan* for ongoing faith formation.

EMERGENCY DRILLS

Emergency drills in all diocesan schools will be conducted per ISBE requirements. Principals should contact their local fire department and law enforcement agency while schools to discuss scheduling of fire and armed intruder drills during the pandemic.

EXTENDED CARE (BEFORE- AND AFTER-SCHOOL CARE)

Schools will try to keep student cohorts separate and to use larger multipurpose rooms, cafeterias, libraries, gyms, etc. to maximize social distancing and floor space. This guidance applies to secondary schools as well.

Students and staff will wear masks.

Sharing any supplies, games, or toys will not be allowed.

Extended care rooms or areas must be cleaned before and after each extended care usage.

EXTRACURRICULAR ACTIVITIES

Principals will use their best judgment in determining whether extracurricular activities can be scheduled safely in the school setting. While schools are still under the pandemic, it may be best to cancel or postpone

an extracurricular activity or schedule it virtually. School health and safety requirements will be followed, including social distancing, masks, PPE, and limiting the number of individuals in one space per IDPH/ISBE and the Governor of Illinois' *Restore Illinois* 5 phase reopening plan. Regulations published by IESA and IHSA concerning school events and activities will be followed.

Athletics: OCS is waiting for more guidance from IESA for grade schools and from IHSA for high schools. Information will be shared with schools as it is received and reviewed.

Band: Large group practices (more than 15 students) may be conducted virtually or in a large space (gym, multipurpose room, cafeteria or outside in order for social distancing to be maintained.

Small group practices (involving 15 or fewer students) may be scheduled in the band/music room with social distancing of six feet. Sharing a musical instrument (i.e., drums) is discouraged, but at the very least, will be cleaned between every student use.

Practices for wind instruments (brass and woodwinds) may be conducted virtually, but if in person, 6 feet of social distancing is required.

Choir, Drama/School Play, Christmas Programs: These programs will be canceled, may be performed virtually, or may be conducted outside (i.e., choir, drama, etc.) while also following the large group gathering guidance from IDPH/ISBE, *Restore Illinois*, IESA and IHSA guidelines for practices and performances.

Other Extracurricular Activities (e.g. academic clubs, debate, chess, etc.): Consider conducting activities virtually. If this is not possible and face-to-face meetings are necessary, masks and social distancing will be maintained. If the activity involves sharing a space (particularly within a grade level class or high school activity), the space will be cleaned and disinfected before and after the activity's use. If it is an IESA- or IHSA-sponsored event, principals will also review and follow these organizations' guidelines during the pandemic.

INFECTION PROTOCOL-WHAT TO DO IF SOMEONE GETS SICK

DEFINITION OF EXPOSURE TO COVID-19

To be considered exposed to COVID-19, you need to have prolonged close contact with a person who has the virus. **Close contact includes** living in the same household, caring for a sick person with the virus, being within 6 feet of a sick person with the virus for at least 15 continuous minutes without the use of a face covering, or being in direct contact with secretions from the sick person.

PREVENTION

As outlined in the *Health and Safety* section, temperature checks of all students and employees will be taken on arrival each morning. Any student, employee (or volunteer) who has a temperature above 100.4 degrees Fahrenheit will be sent home and encouraged to contact a doctor.

Schools will provide professional development in regard to the signs and symptoms of COVID-19 as provided by OSF Healthcare, local public health departments, Catholic Mutual Group, or other medical agencies.

RESPONSE TO COVID-19 SYMPTOMS

Contact: Person is without symptoms but has been made aware a COVID exposure has occurred (family, community, work).

- ✓ Get tested at least 5 days after the exposure. *Testing done prior to 5 days from the exposure may be falsely negative due to insufficient viral reproduction time.*
- ✓ May continue to work/school while awaiting results and wearing a mask, social distancing, and hand washing.
- ✓ Check temperature and symptoms twice a day. Any symptoms should be reported and quarantine begins immediately until test results are returned.
- ✓ Family contact (see below).

Symptomatic:

- ✓ Anyone who is symptomatic for COVID (with or without) known exposure will be sent home immediately.
- ✓ Should also go for PCR nasal testing immediately. *Return to work will be guided by test results and CDC criteria.*
- ✓ Symptoms for COVID include: fever of 100.4 degrees, loss of taste/smell, fatigue/achy muscles, sinus/nasal, sore throat, nausea/vomiting/diarrhea, cough, shortness of breath.
- ✓ It is recommended that student's parents or employee contact their pediatrician or doctor to discuss the symptoms and arrange for an evaluation.
- ✓ Quarantine (no work/school) until: COVID negative or an alternate diagnosis is made (ear infection, strep, flu, etc.)
- ✓ If the pediatrician or doctor feels that an alternate diagnosis is confirmed or likely, the student or employee can return with a physician/APN/PA note AND cessation of symptoms for at least 24 hours without fever reducing medication (Acetaminophen and Ibuprofen).
- ✓ If the student or employee does not seek medical evaluation, does not receive COVID testing, or no alternate diagnosis is discovered, they should be considered a presumptive COVID positive case and shall remain out of school for 10 days from the on-set of symptoms PLUS at least 24 hours from resolution of fever reducing medication (Acetaminophen and Ibuprofen).
- ✓ No need to notify classmates/colleagues unless COVID test is positive.

COVID19 Positive:

- ✓ Quarantine minimum 10 days with 24 hours from resolution of fever-reducing medication ((Acetaminophen and Ibuprofen).
- ✓ Even if not symptomatic, quarantine.
- ✓ Any confirmed case of COVID19 within the school will lead to notification of faculty, staff, students, etc., who have pertinent exposure in order that monitoring can begin.

ISOLATION PROTOCOL

If any student, employee or volunteer is COVID19 positive, principals will immediately contact the Superintendent of Schools. While every situation is unique, the following steps will likely be implemented:

1. The student, employee (or volunteer) will be sent home and monitored for ongoing symptoms, as described above.
2. The principal will distribute the *OCS COVID-19 Exposure Letter* to all parents and employees. *Note:* it is essential that the privacy of the impacted student or employee be protected. Principals should *not* disclose the specific identity of the infected individual to parents or any employees who do not need to know. For example, it would be appropriate to inform a grade level teacher or classroom teacher if a student in the teacher's class has been diagnosed with COVID-19. However, the principal should not inform other teachers in the school (or any parent).
3. The student or employee's classroom/work area will be thoroughly cleaned. Windows in the area will be opened to maximize airflow.
4. The principal will carefully monitor the health of students and teachers who are part of the infected individual's cohort (in the high school, the entire school population will be notified). If more than three students or employee in the cohort are diagnosed with COVID-19, the entire cohort will quarantine and shift to remote learning. Principals will contact the Superintendent of Schools for further instructions *before* initiating a Cohort Quarantine.
5. For high schools, the local public health department and Superintendent of Schools will be contacted in order for a decision to be made on whether or not to close the entire school and self-quarantine.

The principal will distribute the *OCS Quarantine Letter* to all families and employees when a cohort or entire school is placed in quarantine.

The principal will work with the Superintendent of Schools to decide if and when some or all of the cohort members will return to school.

The principal will continue to closely monitor the health of all non-quarantined students and employees.

In cases of widespread infections in a school (particularly multiple cohorts), an entire school may be quarantined. Principals will work with the Superintendent of Schools in determining if a school-wide quarantine is needed.

Students will be allowed to complete and submit academic work while quarantined.

EMPLOYEE QUARANTINES: SICK DAYS

The Office of Catholic Schools is working with the Chancellor and Diocesan Attorney for further direction regarding employment and COVID19 cases as current regulations are changing and/or being modified continually with the unpredictability of the virus. Therefore, information regarding employees' sick days, etc. will be shared with administrators and employees as soon as it can be published. *Until then, principals should contact the Superintendent of Schools for guidance.*

VIRTUAL ACADEMY

For families that do not want their child(ren) to receive in-person instruction while schools are re-opened during the pandemic, they can choose to enroll their child(ren) into the diocesan elementary or secondary school's full-time e-learning virtual academy.

The Virtual Academy is not designed to be a “hybrid” model of in-class instruction on *some* days of the week, coupled with remote learning on the *other* days of the week. The Virtual Academy that each school will create is to allow parents, as the primary educators, to choose instruction in school five days a week or full-time e-learning five days a week.

Each school will determine the length of time that these options will exist, whether for one grading period (e.g., six weeks, nine weeks) or for one full semester or trimester. In other words, whatever option a family chooses will be the delivery of instruction for the indicated amount of time. For example, if a family chooses in-class instruction for one semester (per the published Virtual Academy guidelines for that school), they must stay enrolled for full-time in-class instruction until the beginning of a new semester when they would have the option to choose again.

Extenuating circumstances will be considered by the school’s administration and in consultation with the Superintendent of Schools on a case-by-case basis should a family need to switch options in the midst of the published length of time for in-class or remote learning enrollment. An example would be if a child or family member is stricken with a very serious illness, the family could approach the administration about an immediate change in the delivery of instruction via in-class or remote learning.

Finally, please note: Tuition will **not** be reduced or waived depending on the option that is chosen. Tuition rates will be applied equally no matter whether a family chooses in-class or remote learning. There will be no refunds unless a family terminates their enrollment with the school and then the school’s tuition refund policy, as published in the school handbook, would apply.

ACKNOWLEDGMENTS

In gratitude to these individuals who served in an advisory role for the creation of the *OCS Diocesan Plan* to reopen schools in the Catholic Diocese of Peoria for the 2020-2021 academic year:

OCS Advisory Group

✓ **Medical Community, Peoria**

- Terry Ho, M.D., OSF Healthcare, Pediatrics
- Douglas Kasper, M.D., OSF Medical Group: Infectious Disease
- Lori Racsa, D.O., UnityPoint Health-Methodist

✓ **Medical Community, Bloomington**

- Brian Emm, MD, Bloomington Pediatrics and Allergy, Ltd.
- Stephen Pilcher, MD, Physician, Bloomington Primary Care

✓ **Illinois (Arch)Dioceses Offices of Catholic Schools**

- Mr. Mike Kagan, Superintendent, Diocese of Rockford
- Dr. Jim Rigg, Superintendent, Archdiocese of Chicago
- Rev. John Belmonte, Ph.D., Former Superintendent, Diocese of Joliet
- Dr. Michael Boyle, Superintendent, Diocese of Joliet

- Ms. Brandi Borries, Superintendent, Diocese of Springfield
 - Mr. Jonathan Birdsong, Superintendent, Diocese of Belleville
- ✓ **Offices of the Bishop and the Chancery, Diocese of Peoria**
 - Most Rev. Daniel R. Jenky, CSC, DD, Bishop of Peoria
 - Most Rev. Lou Tylka, DD, Coadjutor Bishop of Peoria
 - Rev. Msgr. Philip D. Halfacre, Vicar General
 - Ms. Patricia Gibson, JD, JCL, Chancellor and Diocesan Attorney
- ✓ **Catholic Mutual Group**
 - Mrs. Melissa Block, ARM, AIC, Claims Risk Manager
- ✓ **Office of Catholic Schools, Diocese of Peoria**
 - Dr. Sharon Weiss, Superintendent
 - Mr. Jerry Sanderson, Associate Superintendent
 - Dr. Susan Stolt, Associate Superintendent
 - Mrs. Roberta Gifford, Administrative Assistant
 - Diocesan Elementary and Secondary School Principals
